Documentation API Documentation

Information

Endpoint
https://www.hostycare.com/manage/modules/addons/ProductsReseller/api/index.php

Authorization

- **Username**This is an email address of the reseller's client registered in your Hostycare.
- **Token**

Token is an API Key transformed into SHA256 hash using the reseller's email address and the current time encoded with base64.

base64_encode(hash_hmac("sha256", "<api-key>", "<email>:<gmdate("y-m-d H")>)"))

Example
```php
$endpoint  = "https://www.hostycare.com/manage/modules/addons/ProductsReseller/api/index.php";

$action    = "/order/products/1";
$params    = [
  "cycle"         => "monthly",
  "hostname"      => "example.com",
  "username"      => "testuser",
  "password"      => "testpassword",
  "nsprefix"      => [ "ns1", "ns2"],
  "fields"        => ["ciuser" => "cloudinituser"],
  "configurations" => [
            "configOptionName1" => "configOptionValue1",
            "configOptionName2" => "configOptionValue2"
        ],

];
$headers = [
  "username: email@example.com",
  "token: ". base64_encode(hash_hmac("sha256", "1234567890QWERTYUIOPASDFGHJKLZXCVBNM",
"email@example.com:".gmdate("y-m-d H")))
];

$curl = curl_init();
curl_setopt($curl, CURLOPT_URL, "{$endpoint}{$action}");
curl_setopt($curl, CURLOPT_POST, true);
curl_setopt($curl, CURLOPT_POSTFIELDS, http_build_query($params));
curl_setopt($curl, CURLOPT_RETURNTRANSFER, true);
curl_setopt($curl, CURLOPT_SSL_VERIFYPEER, true);
curl_setopt($curl, CURLOPT_HTTPHEADER, $headers);

$response = curl_exec($curl);
curl_close($curl);
```

Call

GET - /billing/credit - Get Credit
GET - /version - Get Version
GET - /testConnection - Test Connection
GET - /products - Products List
- withpricing

GET - /customFieldsValues/{id} - Get Custom Fields Values
POST - /order/products/{id} - Create
- hostnameValidators : text
- cycleValidators : required, text
- usernameValidators : text
- passwordValidators : text
- nsprefixValidators : array
- fieldsValidators : customFields
- configurationsValidators : configurableOptions

POST - /services/{id}/suspend - Suspend
POST - /services/{id}/unsuspend - Unsuspend
POST - /services/{id}/upgrade - Upgrade
- newProductIdValidators : required, text
- newCycleValidators : required, text

POST - /services/{id}/changepassword - Change Password
- passwordValidators : required, text

POST - /services/{id}/terminate - Terminate
POST - /services/{id}/renew - Renew
POST - /services/{id}/start - Start
POST - /services/{id}/reboot - Reboot
POST - /services/{id}/stop - Stop
GET - /services/{id} - Details
GET - /services/{id}/graphs - Graphs
- timeframeValidators : text

POST - /services/{id}/reinstall - Reinstall
- passwordValidators : required, text

POST - /services/{id}/noVncConsole - NoVNC Console
POST - /services/{id}/xTermConsole - Xterm.js Console
POST - /services/{id}/spiceConsole - Spice Console
GET - /services/{id}/reinstall - Get Templates For Reinstall
POST - /services/{id}/sslStepOne - SSL Step One
POST - /services/{id}/sslStepTwo - SSL Step Two
POST - /services/{id}/sslStepThree - SSL Step Three
GET - /services/{id}/getInfo - Get Info
POST - /services/{id}/[*] - Submodule Custom Action
POST - /services/{id}/ssoLogin - One Click Login
